## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims, as currently written, are confusing. The claims do not recite any positive reaction steps with any specificity for making the pentadienone of the invention, or any derivatives thereof. The claims contain multiple sentences and subheadings, i.e., multiple periods (.) and semi-colons, and are generally inconsistent with proper claim drafting. Furthermore, claim 1 is missing the formula of the compound being described therein. It is also indefinite because of the phrase, "can represent" in line 8; in line 12, it is unclear what is meant by the phrase, "the temperature *changes*..."

### ***Claim Objections***

Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claim is broader in scope than claim 1, as it recites a broader temperature range and longer reaction time than claim 1.

Art Unit: 1621

Claims 1-7 objected to because of the following informalities: the title of the invention must be removed from the claims; the phrases in parentheses should be removed and/or rewritten as dependent claims. Appropriate correction is required.

The examiner would like to further point out that the application data sheet (ADS) filed by applicants is incomplete.
